DESCRIPTION

TC.Regularized.RSI is an easy to install, multilingual customizable Indicator designed to help traders make profitable decisions 24/5!

RSI is defined in Wilder's 1978 book "New Concepts in Technical Trading systems" and is widely documented. It is used as an operand with an exponential smoothing constant of one and regularization parameter typically of unity. This usage means regularization is being used only for smoothing.

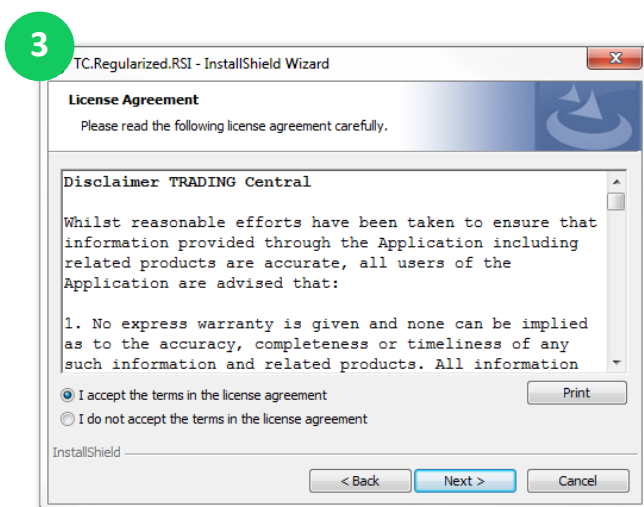

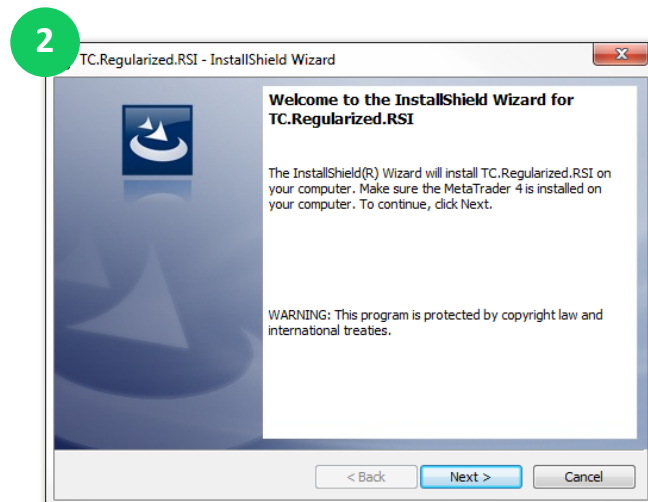

SUBSCRIBING TO THE TRADING CENTRAL LIVE FEED

The TRADING CENTRAL Indicator automatically delivers live data to licensed broker. If the Indicator does not work on your MT4, your broker is probably not licensed by TRADING CENTRAL. In this case please contact your broker and request a license.

INSTALLATION PROCESS

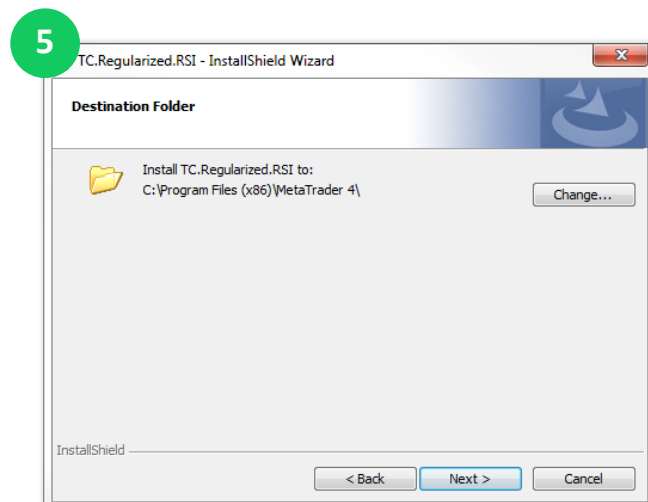

The latest version of our Indicator can be downloaded from: https://feed.tradingcentral.com/ws_indicators.aspx/DownloadInstaller?application=7&platform=1
You need just to follow some simple steps proposed by the installer:

INSTALLATION PROCESS

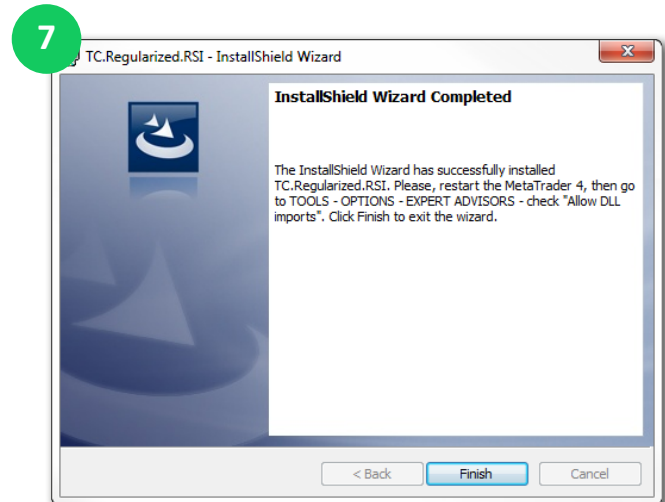

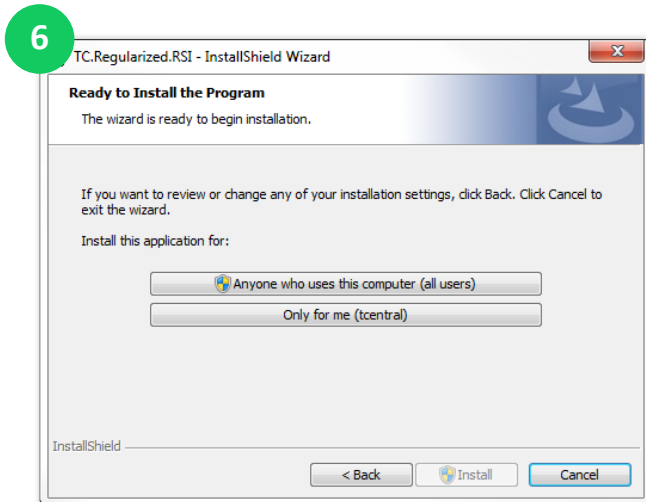

Caution

If you have several MetaTrader platforms installed, you need to choose the platform corresponding to the broker, who provided you with this Indicator.
If you can't find your platform (4), please indicate the proper path to the MetaTrader folder you use (5).

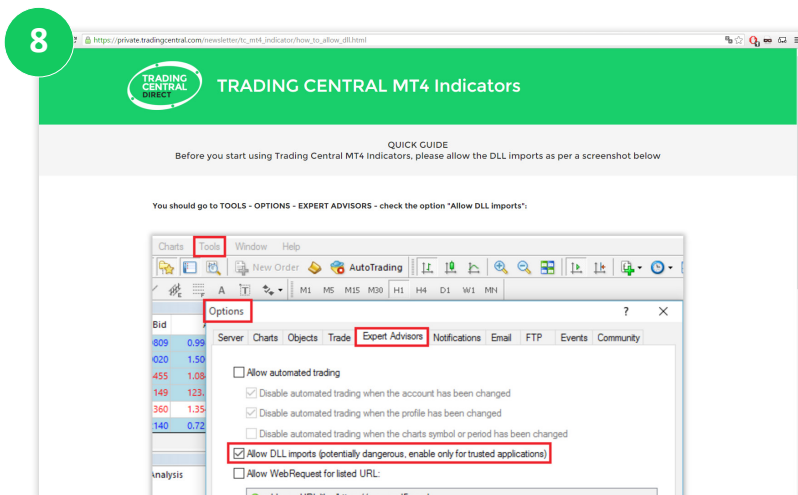

INSTALLATION PROCESS

Now restart your MetaTrader.

Enable DLL

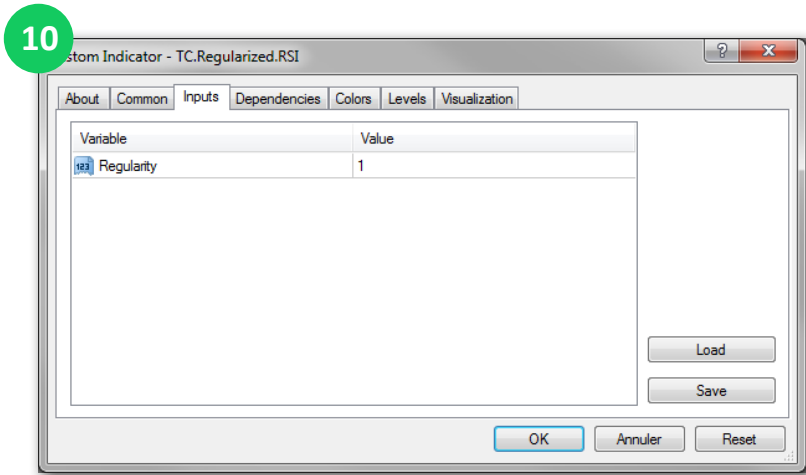

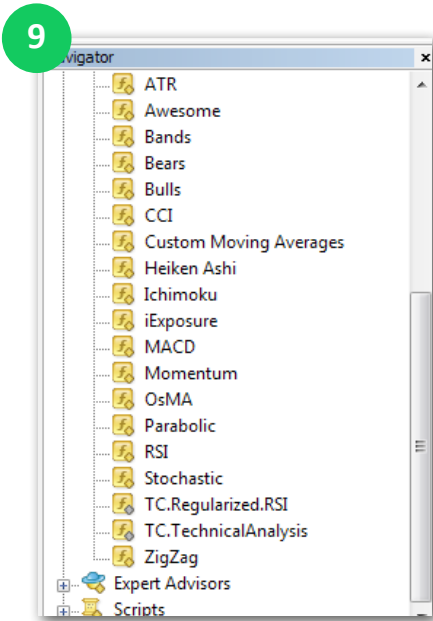

Once the installation is completed, there is an automatic page opened in the browser (8), showing how to activate DLL imports options once for all indicators. If you accidentally closed this window, please follow the link :
https://private.tradingcentral.com/newsletter/tc_mt4_indicator/how_to_allow_dll.html

INDICATOR'S USE AND SET UP

Go to Navigator > Custom Indicators and look for TC.Regularized.RSI
 Drag and drop the Indicator to a chart (9).

In the window that appeared when your drag and drop the Indicator to a chart select the Inputs tab (10). Here, you can set any parameters you wish to personalize the TC.Regularized.RSI (see Features and Parameters).

FEATURES AND PARAMETERS

Features	Default settings	Customizable (parameter name)
Regularization Factor	Regularity: 1	✓ (Regularity) Regularization is a statistical smoothing technique which results in a smooth indicator without the time lag of a traditional moving average. Useful complement to RSI fans.

UPGRADE PROCESS

When a new version of the Indicator is available, a user gets a notification inside their MetaTrader and the loading starts automatically after clicking the OK button.

The previous version is no longer valid.
