# BUYING SELLING PRESSURE for MT4

## Set up & Configuration Guide

## CONTENT

Description	1	Indicator's use and set up	4
Subscribing to TRADING CENTRAL feed	1	Features and parameters	5
Installation process	1	Upgrade process	5

## DESCRIPTION

**TC.Regularized.Buying.Selling.Pressure is an easy to install, multilingual customizable Indicator designed to help traders make profitable decisions 24/5!**

BUYING SELLING PRESSURE (BSP) reflects the underlying tendency of close prices to cluster near the highs in an uptrend and near the lows in a downtrend. BSP is a noisy signal and regularization helps in getting rid of noise and thus makes it useful as a trading indicator.

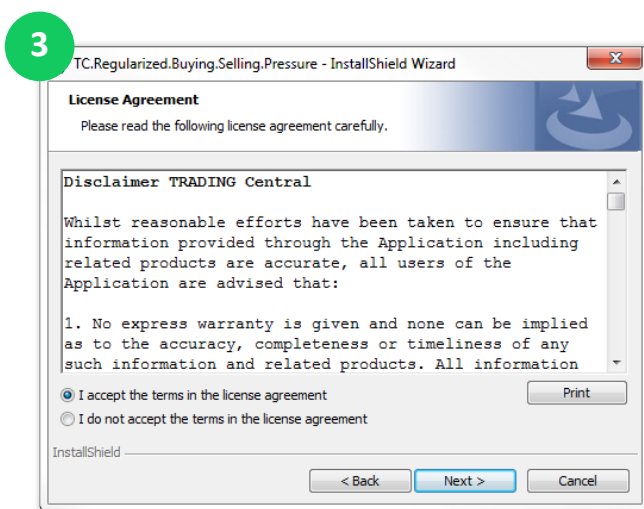

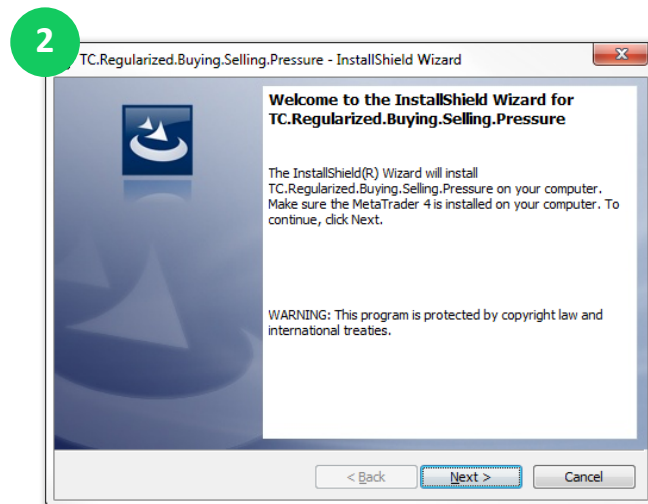

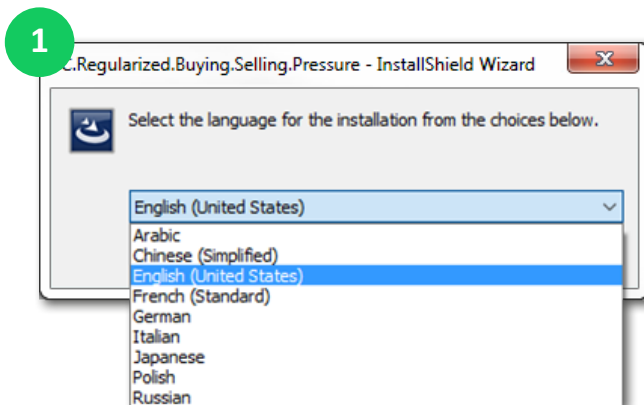

## SUBSCRIBING TO THE TRADING CENTRAL LIVE FEED

The TRADING CENTRAL Indicator automatically delivers live data to licensed broker. If the Indicator does not work on your MT4, your broker is probably not licensed by TRADING CENTRAL. In this case please contact your broker and request a license.

## INSTALLATION PROCESS

The latest version of our Indicator can be downloaded from: [https://feed.tradingcentral.com/ws\\_indicators.aspx/DownloadInstaller?application=5&platform=1](https://feed.tradingcentral.com/ws_indicators.aspx/DownloadInstaller?application=5&platform=1)  
You need just to follow some simple steps proposed by the installer:

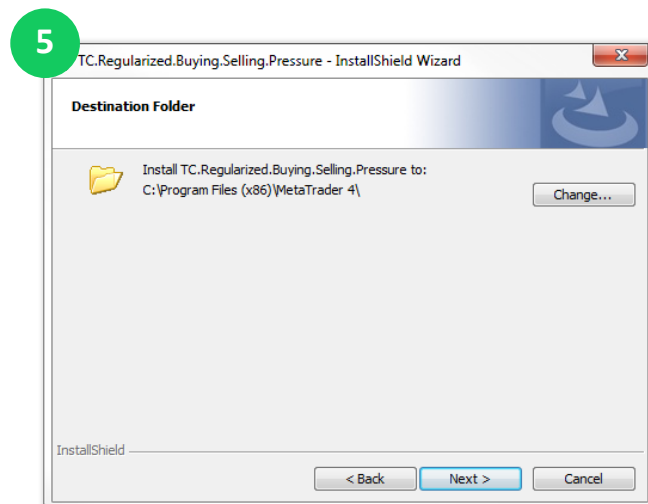

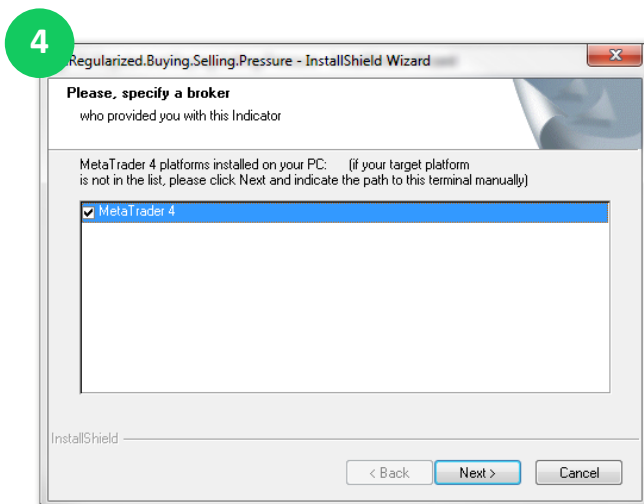

# INSTALLATION PROCESS

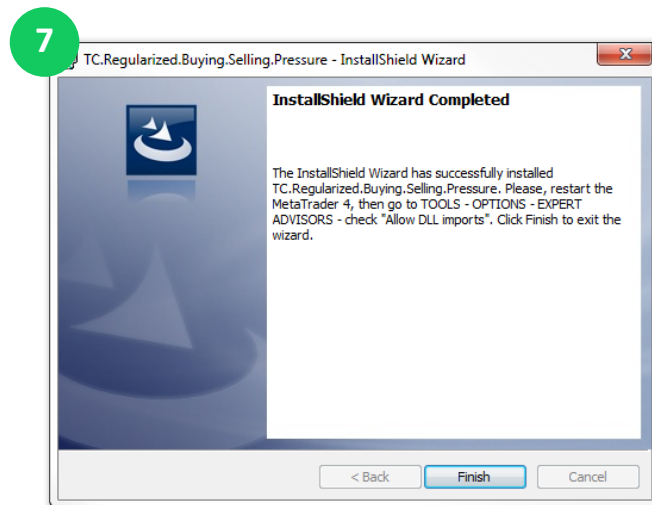

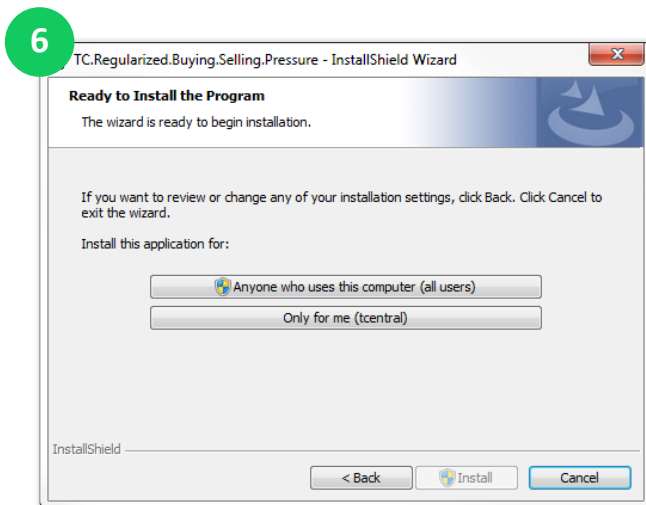

## Warning

If you have several MetaTrader platforms installed, you need to choose the platform corresponding to the broker, who provided you with this Indicator.

If you can't find your platform (4), please indicate the proper path to the MetaTrader folder you use (5).

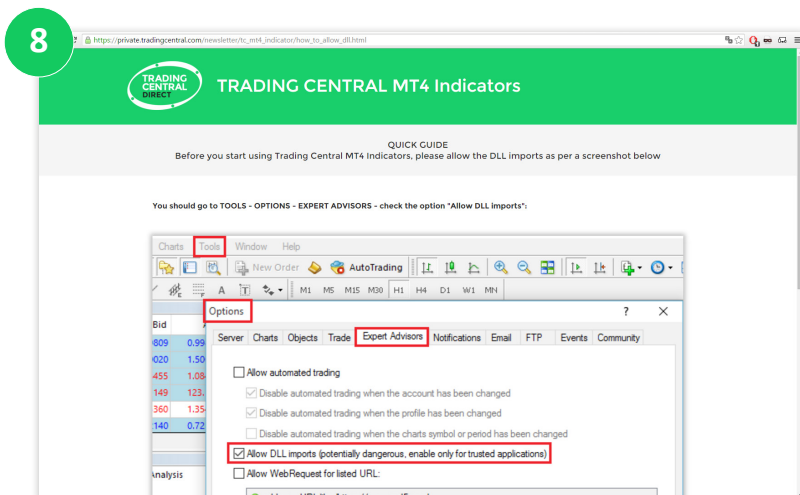

# INSTALLATION PROCESS

Now restart your MetaTrader.

## Enable DLL

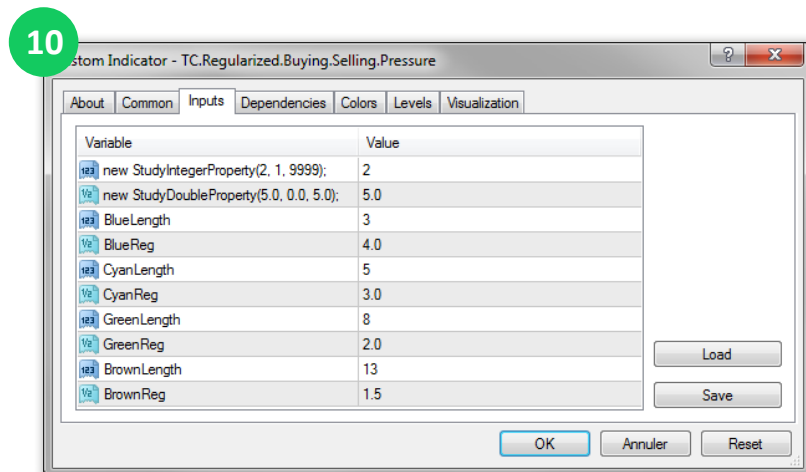

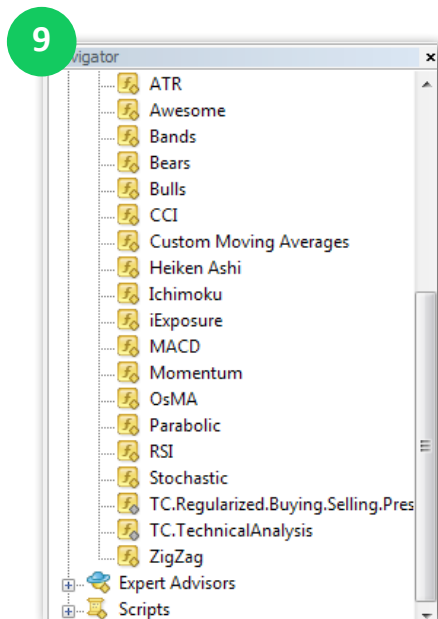

Once the installation is completed, there is an automatic page opened in the browser (8), showing how to activate DLL imports options once for all indicators. If you accidentally closed this window, please follow the link :  
[https://private.tradingcentral.com/newsletter/tc\\_mt4\\_indicator/how\\_to\\_allow\\_dll.html](https://private.tradingcentral.com/newsletter/tc_mt4_indicator/how_to_allow_dll.html)

## INDICATOR'S USE AND SET UP

Go to Navigator > Custom Indicators and look for TC.Regularized.Buying.Slling.Pressure  
Drag and drop the Indicator to a chart (9).

In the window that appeared when your drag and drop the Indicator to a chart select the Inputs tab (10). Here, you can set any parameters you wish to personalize the TC.Regularized.Buying.Selling.Pressure (see Features and Parameters).

## FEATURES AND PARAMETERS

Features	Default settings	Customizable (parameter name)
Length	RedLength: 2 BlueLength: 3 CyanLength: 5 GreenLength: 8 BrownLength: 13	<p>✓ (RedLength) ✓ (BlueLength) ✓ (CyanLength) ✓ (GreenLength) ✓ (BrownLength)</p> <p>BSP is an alternative perspective on momentum which reflects buying/selling pressure in the market. This is particularly useful for strategies based on turning points and fixed thresholds.</p>
Regularization Factor	RedReg: 5.0 BlueReg: 4.0 CyanReg: 3.0 GreenReg: 2.0 BrownReg: 1.5	<p>✓ (RedReg) ✓ (BlueReg) ✓ (CyanReg) ✓ (GreenReg) ✓ (BrownReg)</p> <p>The shorter the length, the higher the regularization factor by default. Regularization is a statistical smoothing technique which results in a smooth indicator without the time lag of a traditional moving average</p>
Font	System	✓ (CustomFont)
Possibility to manually set the product to analyze	Automatically retrieved by the Indicator (when you apply it to a chart)	<p>✓ (CustomSymbol)</p> <p>Normally there is no need to set it manually, because we have all product codes used by brokers and this code is retrieved automatically from your chart. But, if the matching is not correct, you can type yourself here the correct symbol.</p>

## UPGRADE PROCESS

When a new version of the Indicator is available, a user gets a notification inside their MetaTrader and the loading starts automatically after clicking the OK button.

The previous version is no longer valid.
